GARDENS ON BASE LINE ROAD (Near Portland)

Nurseryman's License No. 75 Oregon State Board of Horticulture

Perennials --- Irises
Peonies
Specializing in Choice Alpines

Seventeenth Annual Catalog
1930

Dannias

Plan Your Garden

Garden plans aren't quite so necessary as house plans, but they do mean added interest and attractiveness, and it's a fascinating occupation to sit down with pencil and paper in advance of the season for outdoor work, figuring where this and that choice plant are to be placed. And rather good sense to get your order in early, too, if you don't want to be disappointed.

If You Are in Doubt

and willing to accept suggestions as to suitable plants, either in the perennial border or rock garden, I shall consider it a privilege to make them. But be sure to tell me whether the location is a sunny one, lightly shaded or considerably so. It is difficult to plant, with any degree of success, where trees are so near that their roots sap the ground of its moisture and fertility.

Annuals

Many of us know these best as "Bedding Plants." They are very desirable to supplement our perennial plants, giving quantities of flowers in mid-summer and early fall. No attempt is made to catalog these offerings for distant trade, but visitors from Portland will find zinnias, asters, marigolds and other popular plants available at my gardens in the spring. Planting is rarely desirable before May, unless the season should be especially forward.

Seventeenth Annual Catalog THE W. L. CRISSEY ALPINE GARDENS

Y gardens are located on the well-known Base Line Road, about mid-way between the Ruby Golf Links and "Twelve Mile Corner"—a leisurely half hour's drive from the center of Portland. Pavement all the way, of Portlanders will be familiar with the landmarks

course. Portlanders will be familiar with the landmarks mentioned, strangers will have no difficulty in being directed. Convenience of location is combined with most favorable growing conditions. Fine soil, unlimited water and excellent drainage all do their share toward giving my plants the exceptional vigor which assures their success when transplanted to your own garden.

In Normal Years

The prim little beds of rock plants begin to show color here and there as early as February, for Alpines are venturesome, not dismayed by a bit of cold or wind, which only serves to remind them of their birth-place in the mountains. March sees general growth and generous budding; April finds sheets of color scattered everywhere. This season an arresting combination will be a border of purple and gold on each side of the wide central path—G. Wermig Violas flanked by that glory of the spring Alyssum Saxatile. I fancy a number of my customers will want to duplicate this particular effect. particular effect.

Summer and Fall Display

After spring's luxuriant show the gardens are still decidedly worth the seeing, for there will always be a goodly number of rock plants showing flowers, while most perennials are at their best in summer and autumn.

If You Do Not Live in Portland

Distance is no barrier to obtaining my plants, for they will be packed with special care to reach any part of the United States in excellent condition. Exhibition plants in full bloom have gone to both the Chicago and New York flower shows the past two years, arriving with their attractiveness unimpaired. We are equipped to give prompt attention to mail orders, and many of my most valued customers are distant ones.

Two Reasons for Early Ordering

All plants give best results if planted just as early as your weather and ground will permit. Besides, there may be a shortage of some stocks, and consequent disappointment. February is none too soon to plant on the Pacific Slope.

A Suggestion to Gardeners in the East and North

It's very tempting to delay your order until settled weather, which often means May, but by that time my plants are rather advanced in growth to transplant to greatest advantage. Why not have the shipment made in March or early April, and construct a cold frame to receive the plants until outside conditions make permanent planting in the garden advisable? A cold frame is nothing but a frame of rough boards covered with a sash or two of glass, easily obtained through any dealer. obtained through any dealer.

And When You Make Up Your Order

Don't get just one plant of a sort unless your space is very limited. Plants are sociable, just like folks, and they enjoy company. Have at least a few modest masses of one sort and color, then the single specimens if you wish.

Consult Your Own Preferences

Half the fun of gardening comes from experimenting for yourself, perhaps an occasional indulgence in friendly rivalry with a gardening neighbor to see which can get something different and unique. The effect you get may not be perfect the first year, but in the fall you can do a little juggling. Again, you may achieve an arrangement so beautiful as to surprise yourself and your friends.

Cut Flowers for Home or Party

Bulbous irises, peonies, gladioli and numerous perennials afford quantities of flowers from spring until autumn, and these may be had at most reasonable prices at the gardens. The drive over the Base Line Road is a pleasure rather than a task.

Few Fastidious Plants Are Offered

Realizing that the average gardener is most interested in plants which do not require pampering, my lists include a sparse half-dozen subjects even approaching the difficult. It is my ambition to add a limited number of the capricious ones a little later, for enthusiastic rock-gardeners are always anxious to obtain something out-of-the-ordinary, and to try their skill in growing it to perfection.

Perfect Drainage a Necessity

If your soil is very heavy, add sand and finely crushed stone liberally, and if possible some leaf mould from the woods. A mixture of one part of each of these with one part of soil would be quite ideal, though not at all required for success with the more ordinary plants. In spring many rock gardeners take a basket of leaf mould and sand, and with a trowel work in a generous application of this around such plants as seem to need it, either because of straggly growth or because their roots have become bare through watering or rain. A sharp cutting back of straggly plants in very early spring is highly beneficial.

Why I Specialize on Alpines

Rock gardening has gained such tremendous popularity that I might almost say I am specializing in Alpines in self-defense, so insistent has been the call for them. I find them by far the most interesting things that I have ever grown. Their infinite variety; their prodigal display of soft or brilliant color when in flower; the beauty and diversity of their foliage, which ranges through many gradations of green and gray and bronze, and is often of evergreen character; the graceful manner in which they mask the surface of a wall or tumble in abandon about the miniature valleys and cliffs of the rock garden—all these pleasing qualities give rock plants a fascination all their own.

Building the Rock Garden

Authorities are one in saying that the man-made rock garden should duplicate, as nearly as possible, the natural out-cropping of rock as found on hill or mountain side. In many locations a comparatively few rocks, well placed, will give an excellent effect. Liberal pockets of earth and generous planting spaces are just as necessary as rocks, for after all it is the plants which are of paramount importance.

Rock Walls

The prevailing impression is that the solid cement wall has greater strength, but the fact is that the properly constructed rock wall, laid without mortar and thus affording perfect drainage, will have equal or greater strength and be more satisfactory in every way, to say nothing of its picturesque possibilities when suitable plants are introduced These are properly planted when the wall is being built, as then the roots can more easily be brought in contact with the earth back of the wall.

Rock Plants Without Rocks

If you want to find out for yourself just how charming Alpines are, but have no rockery, I must tell you confidentially that most of my own are grown without a rock in sight, and there is no reason why you can't do the same thing, provided soil and exposure are suitable. Many varieties of Dianthus, Veronicas, dwarf Irises, etc., are admirably adapted to border the taller perennials.

FOR CONVENIENCE

And because it is hard to arbitrarily divide rock plants and general garden perennials, all are included under the listing of perennials.

An (R) will designate those especially suited to the rock Special lists will be found on pages 38 and 39.

IMPORTANT

Unless the description specifies that a plant thrives best in shade or semi-shade, please understand that the preference is for a sunny location. The majority do need sun for best development.

PERENNIALS

A garden of perennials grows more beautiful year by year, and they present such an infinite variety in flower and plant that every taste can be suited. I'm going to urge, if your space permits, that several plants of a sort be used in your garden (except the larger plants, where perhaps a single one may be very effective) rather than just one plant each of many kinds. I think you'll be better pleased with the result.

And please order and plant early if possible—early planting is one of the greatest factors of success. Besides, in

some of the rarer things, stock is limited.		
	ich D	ozen
ACAENA GLABRA: (R) A pretty little plant		
resembling a tiny rose-bush. More remarkable for foliage than flowers. 5 inches	.30	3.00
ACHILLEA AGERATIFOLIA: (R) Rosettes		0.00
of silver gray foliage, hugging the ground.

ANDROSACE PRIMULOIDES: (R) Rosettes		
of silky foliage and rosy lilac flowers combine		
to make this an unusually attractive subject		
for the rock garden. A top dressing of gravel		
or stone chips to keep the foliage off the moist	75	7.50
winter earth is almost essential	.75	7.50
Small potted plants, special at	.35	3.50

Why Not Have Two Gardens

Plant rows of flowers in the back yard or vegetable garden, to be used exclusively for cutting. The more ornamental planting about the house may then be left undisturbed to beautify the grounds.

ANEMONE

	ach D	ozen
Anemone Huphensis: (R) NEW. Plants only 15 inches high, the flowers of delicate pink but half the size of the well-known Japanese		
	.35	3.50
Anemone Japonica "Louise Uhink": Very large semi-double pure white flowers. Handsomest		
anemone in my gardens. 3 feet	.40	4.00
Anemone Japonica "Max Vogel": Huge flowers of lavender-pink. Semi-double. These are		
twice the size of the ordinary type. 3 feet	.40	4.00
Anemone Japonica: "Queen Charlotte." Well named, as this plant is really a queen among fall perennials, and magnificent en masse.		
Lavender-pink, semi-double flowers from August until frost. Half shade is a requirement		
for finest display	.35	3.50
Much larger plants	.50	5.00
Anemone Japonica Rubra: Rose red. 2 feet	.35	3.50
Anemone Japonica "Whirlwind": Pure white		
flowers, at same prices as Queen Charlotte.		
Anemone Pulsatilla: (R) Big, fragile looking anemones of lavender spring from the crown		
of attractively cut leaves. Neither plant nor		
flower are at all fragile in reality, but unusually hardy. 6 inches	.35	3.50
Anemone Rivularis: (R) White flowers, the outside violet. A very distinct form. 1 foot	.25	2.50
Anemone St. Brigid's: (R) Some single, some double, the colors embracing white and many shades of blue, pink and red. Fine for cutting.		
They bloom for many weeks	25	2.50

THOSE GIANT JAPANESE ANEMONES

Don't overlook these remarkable novelties. They come in both pink and white, and are among the very few plants which succeed best in rather a shaded position. True perennials, of course.

ANTENNARIA UMBRINELLA: (R) Forms an attractive mat of silver gray. Flowers white. 3 inches		3.50
AQUILEGIA: Mrs. Scott-Elliott hybrids. These are from the English originator, an absolutely unexcelled strain with long spurred flowers of		
delicate colors	.30	3.00
AQUILEGIA ALPINA: (R) A dainty plant, but 10 inches tall when in flower. The color		
is a clear blue and white. Short spurs	.35	3.50
AQUILEGIA COERULEA: (R) The famous Rocky Mountain columbine in fetching garb		
of blue and white	.30	3.00
AQUILEGIA FLABELLATA: (R) A lovely		3.50
dwarf white		3.30
AQUILEGIA GLANDULOSA: (R) Books		
on rock gardening depict this as the acme of		
grace. Flowers are deep blue and large. 1		
foot. Strong plants at	.35	3.50

PLANTS ARE CAREFULLY LABELED

Of course you will want to familiarize yourself with the names, both for your own satisfaction and the added interest in showing your garden to friends.

tufted Alpine with white flowers. Very much smaller than Arenaria Montana	.25	2.50
ARENARIA MONTANA: (R) A plant of	.25	2.30
slender graceful growth its dark green stems		
slender, graceful growth, its dark green stems smothered in white flowers in late spring.		
Most desirable in every way	.35	3.50
ARMERIA VULGARIS: (R) Grasslike foliage		
with pretty rose flowers on 9 inch stems. Fine		
for edging or rockery	.25	2.50
ARTEMISIA		
	ach D	0701
Artemisia Frigida: (R) Another silver-foliaged	icii D	OZCII
plant that is extra fine	.30	3.00
Artemisia Lactiflora: In late August and Sep-	•••	0.00
tember its fleecy white plumes are most dec-		
orative in the garden. The hawthorne fra-		
orative in the garden. The hawthorne fra- grance is very marked. Fine informal hedge		
or screen. 6 feet	.35	3.50
Artemisia Pedemontana: Conspicuous and ef-		
fective as a silvery foil for other plants.		
Combine with pink or red flowers. 2 feet	.35	3.50
ASPERULA CYNANCHICA: (R) Makes a		
perfect network of feathery, angular branches,		
	.30	3.00

PACKING PLANTS FOR SHIPMENT

Packed with care in damp moss, plants usually reach their destination as fresh as when dug. They are sent with equal success to customers on the Pacific and the Atlantic Coast. Parcel post for small packages, express for the larger ones.

A Background Enhances the Garden

ASTERS—Perennial

("Michaelmas Daisies")

Do not confuse these with the annual bedding asters. The perennials are robust growers, the taller sorts especially good for planting at the back of borders or at the edge of a bit of woodland. Their masses of flowers in the autumn give one of the finest effects imaginable.

Ea Ea	acn D	ozen
Barr's Pink: Finest and newest of all the large pink flowering sorts. Five feet	.50	5.00

CHRYSANTHEMUMS

2.50

feet

These are the last flowers to give a real display in the garden and are doubly acceptable on that account. We all know their possibilities in bowl or basket, for the house. Many of these will be furnished about May 1 as potted plants, a highly satisfactory method of planting. None of these are of tall—straggly habit.

All sorts listed below are 25 cents each; a dozen of a single

sort \$2.50—except where specially noted.

Each Dozen Amelia: Absolutely distinct and new, this vari-.60 6.00 Golden Climax: Small brilliant yellow pompon.

Henri Vincent: The finest bronze that I've grown.

Flowers of medium size and rather early. Could be disbudded for larger bloom...... .25 2.50 Hilda Channing: Charming bronze pompon.

Indian: Soft shade best described as old red.

Iva: Bronze, pompon type. Miss Helen Borman: Japanese Anemone type, a circle of terra cotta bornaze petals surrounding the crested center of pale buff. I am not sure that this is hardy in cold climates. 25c each, \$2.50 dozen.

Mrs. Harrison Craig: Yellow overlaid with orange-crimson.

Very early. Unique. 35c each, \$3.50 dozen.

Normandy: Large light pink, extra early. Finest of all.

	1 7

ables me to name the low price of	.50	5.00
DIANTHUS E	och T	ozen
Dianthus Allwoodi: These are of English origin,	acii L	OZEII
and the sort I offer is a brilliant cerise. Flow-		
ers for a very long period. Single. 15 inches	.30	3.00
Dianthus Alpinus: (R) Likes a little lime in loose		
loam. Large flowers of brilliant rose. Re-		
wards a little pampering	.50	5.00
Dianthus Arenarius: (R) As indicated by the		
name, a sandy soil suits this pink admirably.		
Flowers white, deeply fringed and fragrant. Rather late bloomer	.25	2.50
Dianthus Arvenensis: (R) A diminutive form	.23	2.50
of Dianthus Caessius, very neat and attractive.		
Flowers pink, on 3-inch stems	.35	3.50
Dianthus Caesius: (R) A wonderful garden pink,		
with very erect stems and small single flowers		
in varying shades of pink. The foliage is itself most ornamental. Much used for rockeries.		
most ornamental. Much used for rockeries.	20	2 00
The handsomest hardy pink in my gardens. 9" Dianthus Campestris: Of unusual, upright and	.30	3.00
slender habit. Flowers a soft pink. I foot	.25	2.50
Dianthus Caucasicus: A vigorous pink trailer re-	0	
sembling Deltoides 3 inches	.25	2.50
Dianthus Deltoides: (R) Tiny flowers of deep		
rose color completely cover the plant in spring.		
Try a dozen in border or rock garden		
D: 11 ((01 1 . 0 (* 11)) (D)	.25	2.50
Dianthus "Gladys Cranfield." The finest hardy	.25	2.50

	Tradition and	To the state of th
Pinks topping a wall	ch Do	
Dianthus Kamtschaticus: (R) A trailing rock pink of recent introduction, most remarkable for the freedom with which it produces its large deep rose blossoms. With me it bloomed for five months	.35	3.50
Dianthus Neglectus: (R) Many call this the handsomest of rock pinks. A striking cherry red is the color. Gritty soil and perfect drain-	.50	5.00
Dianthus Plumarius: (R) Just the well-known, old-fashioned garden pinks, saturating the spring air with their fragrance and casting enchantment over the garden in general. Pink		
or white, as you prefer. \$15.00 the 100 Dianthus—Selected Rock Hybrids: (R) Resembling Dianthus Deltoides, but with considerable variation in foliage and flower. Very	.25	2.50
low growing, with dainty little blossoms Dianthus Sundermanii: (R) Snow white flowers, small but perfect, and appearing very late. The true jasmine fragrance is a never-	.25	2.50
failing surprise. A generous planting perfumes the neighborhood at nightfall	.40	4.00
DICENTRA SPECTABLIS: "Bleeding Heart." Well-known favorite with drooping racemes of pink flowers. 2 feet. I offer large 2-year plants DORONICUM CAUCASICUM: Flowers like a huge yellow daisy, 3 inches across, on 15-inch	.75	7.50
stems. One of the earliest glints of sunshine in the garden DORONICUM CORDATA: A bold and strik-	.25	2.50
ing perennial, with large leaves and brilliant orange flowers on two to three foot stems DRABA REPENS: (R) Tiny mustard-yellow	.35	3.50
flowers in profusion over a long period in late spring. 6 inches	.25	2.50
summer. 9 inches	.30	3.00
ERICA CARNEA ROSEA: (R) A charming pink heather which on the Pacific Coast blooms from November to March, even under snow. Questionably hardy in very cold climates. I foot. Splendid shrub to use as a		
group in the rock garden. Plant early	1.00	10.00
Smaller plants	.75	
Compact plants the size of your fist	.25	2.50

		Oozen
ERICA "Irish Heather": (R) Forms a symetrical little bush of dark evergreen foliage. In late		
summer a profusion of pale pink flowers cover the branches. Large plants only		
ERICA VAGANS: (R) Summer flowering and white, of loose, graceful growth—15 inches	.25	2.50
ERIGERON ELATIOR: The pretty lavender flowers are produced all summer. 15 inches. This variety is new and very desirable		2.50
ERIGERON GLABRA: (R) A native of the Cascade Mountains. Small lavender flowers smother the plant. A vigorous grower. 8		
inches		2.50
Free and persistent flowering	.30	3.00
ERIGERON MULTIRADIATUS ROSEA: (R) New. Dwarf habit, attractive pink blossoms	.35	3.50
ERINUS ALPINUS: (R) 4 inches would cover the height of the leafy rosettes and delicate		
lavender flowers. A choice Alpine most successfully grown in the rock-wall	.25	2.50
ERINUS ALPINUS CARMINEUS: (R) The red flowers are a decided departure from type. Charming rosettes of foliage. 6 inches. For		
rock-wall CAFSDITOSIIM (P) "Ora	.35	3.50
gon Sunshine." Of course the flowers are a rich yellow. Foliage of soft gray-green. Likes full sun. 8 inches. Superior for the rockery, but effective anywhere and especially in very poor soil	.25	2.50
ERYNGIUM OLIVERANUM: From a cluster of glossy leaves rises a branched stem some four feet in height. The thistle-like flowers,		
which are very numerous, assume an amethyst sheen	.40	4.00
ERYNGIUM ZABELI: A much bolder type than the preceding, forming specimen clumps 3 feet in height. Small plants	.40	4.00
Specimen clumps		7.00
dwarf species, forming close mats of dark green, later eclipsed with yellow bloom.		
Sandy soil	.25	2.50
mental grass that is the climax of grace. Forms handsome clumps. Dark green	.50	5.00
EULALIA JAPONICA VARIEGATA: A heavier leaf than the preceding, and variegated		2.50
withy creamy stripes. 5 feet	.33	3.50
some plants attain a height of 15 inches. Large flowers of velvety texture, rich light purple in color	.50	5.00
pink flowers abundantly borne. Makes a large plant. 1 foot	.35	3.50

Ea	ich D	ozen
GEUM CILIATUM: (R) The most attractive feature of this plant is the feathery seed-pods which are an ornament to the garden for a long time. 8 inches	.35	3.50
GEUM "LADY STRATHEDEN": Rich orange flowers, a decided novelty in this popular plant. Double, free flowering	.25	2.00
GEUM "MRS. BRADSHAW": Brilliant orange scarlet flowers resembling small roses, cover the plant all summer. You'll be delighted with a liberal planting of these	.25	2.50
GEUM "ORANGE QUEEN": Large flowers of brighter yellow than Lady Stratheden. NEW. 2 feet	.35	3.50
GEUM REPTANS: (R) Vivid yellow flowers. The plant does not exceed 3 inches in height. Worthy of a choice pocket in the rockery	.50	5.00
glossy leaves often assume a deep purple tint, the flowers about the size of marbles and a pretty blue. 6 inches	.30	3.00
GRAPE HYACINTHS: (See Muscari).		
GYPSOPHILA ACUTIFOLIA: "Baby Breath." Tiny white flowers, fragrant and earlier than Paniculata	.25	2.50
GYPSOPHILA REPENS ROSEA: (R) A fine trailing plant, for rockery or wall. Delicate rose colored flowers. Truth compels the statement that the color is so delicate that it is sometimes almost white	.30	2.50
HARPALIUM RIGIDUM: Long, golden petals around a brown center, like a refined and glorified sunflower. 6 to 8 feet. Try it against lattice or garage		2.50
HARPALIUM RIGIDUM "DANIEL DE- WAR": Handsome flowers of stiff semi- quilled formation—color rich golden yellow. Very upright growth. 3 feet		
HEATHER: (See Erica).		
THE HELENIUMS		
These are magnificent for generous use in	the	earlsr
autumn garden. All grow about 4 feet tall and are to cut. Bloom well the first year.	e exce	ellent
Autumn Queen: Old gold, reverse of petals copper	.25	2.50
Autumnal Rubrum: A novelty. Almost oxblood red	.35	3.50
Hoopesi: This is an earlier blooming kind, with flowers from May until late summer. Clear golden yellow	.25	2.50
Riverton Beauty: Clear lemon yellow	.25	2.50

HELIANTHEMUMS (R)

The "Sun roses" are among the most effective plants employed in the rock garden, semi-shrubby and evergreen, and with a wealth of beautiful flowers. They vary from those of trailing habit to a height of perhaps 9 inches. The plants offered are all extra strong and of good size. I do not carry the ordinary mixed colors, offered at a lower price.

serves a "reserved seat" in the rock garden HYPERICUM FRAGILE: (R) Trailing, and good, whether in leaf or flower. Bright yellow	.50	5.00
blossoms on 6-inch stems HYPERICUM MOSERIANUM: Taller than	.35	3.50
the preceding varieties, being sometimes 18 inches in height. Spreads rapidly	.30	3.00
similar to Hypericum Repens, and equally fine foliage	.35	3.50
slender stems, clothed with pretty leaves and terminating in golden yellow flowers, make this one of the most satisfactory rock garden subjects. Evergreen. 6 inches	.25	2.50
perennial candytuft, completely smothered with rose lavender flowers about Decoration Day. Evergreen. 9 inches. Will do best if		
planted early	.25	2.00

The path of the rainbow

IRISES—Germanica

No other hardy plant is getting quite so much attention nowadays as the Iris, and if you have seen an Iris-bordered path in June, flaunting its regal purple and delicate lavender and rich bronze in the spring sunshine, or have had the privilege of viewing a collection which included some of the magnificent new introductions from France and England and our own American originators, you will admit there is

ample reason.

Irises increase rapidly and soon form handsome clumps. They are transplanted in early spring or early fall with equal certainty of thriving in their new locations, but fall planting gives greater assurance of flowers the first season. The roots should not be set too deep—a couple of inches of soil to cover is sufficient. They require good drainage and prefer full sunshine. Manure is particularly distasteful to them and often fatal, but bone-meal and air-slaked lime are excellent. June is the month of most prolific bloom.

	ach I	ozen
LINUM NARBONENSE: (R) Of angular, picturesque growth, the flowers an exquisite shade of blue. Long blooming	.40	4.00
LINUM PERENNE: (R) "The Blue Sky Flower." Dainty foliage and dainty azure flowers throughout the summer give this plant more than ordinary interest	.25	2.50
LITHOSPERMUM PROSTRATUM: (R) A trailing evergreen with flowers of intense gentian blue. Well adapted to falling over a wall or draping a large rock. Small potted plants	.50	5.00
LYCHNIS VISCARIA SPLENDENS PLENA: (R) This plant will be noticed in any rock garden, no matter how choice the other occupants may be. Clear cerise flowers on 8-inch stems form a perfect mound of arresting color. The plant itself is a low tuft of grassy leaves. Stock limited	.35	3.50
MICHAELMAS DAISIES: (See Asters).		
MONARDA DIDYMA: "Bergamot" is the popular name of this, and the variety is Cambridge Scarlet. A very showy plant with crimson flowers of fantastic form. Use it as an informal hedge between you and your neighbor	.25	2.50
MUSCARI (GRAPE HYACINTHS): (R) These fall-planted bulbs are best set in August or September, and naturalize splendidly under trees (not evergreens, but apple or maple), and are suited to the rock garden as well, where they soon form most satisfying colonies. The brilliant blue flowers make a striking display for some weeks in the spring. The price is 75 cents the dozen, or \$5.00 for a whole hundred.		
MYOSOTIS ALPESTRIS VICTORIA INDIGO BLUE: (R) A truly lovely forget-me-not, of brighter color than most. Extra fine plants	.20	1.50
NEPETA MUSSINI: (R) Tumbling masses of gray-green foliage as a foil for the clouds of lavender flowers. Nothing more satisfactory for liberal use in the rock garden or border. 1		
foot	.25	2.50

ORDER EARLY

.50

PANSIES: The choicest procurable strain.

Mixed colors....

Shipment can be made at any desired time, but it will insure you against disappointment if the order is booked while stocks are complete. This is particularly true of rare Alpines.

PAPAVER (Poppies)

THE MAN DIC (1 oppies)		
Nudicaule "Excelsior Strain": (R) Exhibiting	ach D	ozen
those new pastel shades so much sought in the Iceland poppies. Small plants only, but they will bloom abundantly this season. Two for 25c		1.00
Orientalis Pink: The finest of this color that it has been my good fortune to see. Lasts well in water if cut just as expanding	.40	4.00
Orientalis Scarlet: Immense flowers of vivid scarlet. They are often 8 to 10 inches across. Set in early spring or late August	.25	2.50
Rupifragum: (R) A bit of orange silk wafted to American gardens from the Pyrenees Moun- tains in Spain. 1 foot. Likes hot, dry situa- tion. Always in bloom if not allowed to seed	.25	2.50
PENSTEMON		
Penstemon Menziesii—Rupicola: (R) Very dwarf, gray foliage, handsome red flowers	.50	5.00
Penstemon Ovatus Douglasi: (R) The plant itself is a low cluster of burnished green leaves; the flowers deep, rich blue, changing to mauve as they age. They are borne in profusion on stems varying from a foot high in their mountain habitat, to perhaps three feet in exceptionally rich garden soil. An exquisite subject for either rock garden or perennial border. Give sunny exposure. Fine blooming size		
plants	.25	2.50
Penstemon Pubescens: (R) Pale pink or blue flowers. A very choice little plant. 6 inches	.35	3.50
Penstemon Rattani Minor: (R) Found on Mt. Hood at elevation of 6000 feet. Shining green leaves in pleasantly spreading tufts. Soft blue	25	2.50
or mauve flowers. 4 inches Penstemon Smalli: A basal tuft of rather large leaves, with a 3 foot stalk supporting dainty	,25	2.50
bells of white, tinged lavender	.25	2.50

PEONIES

Every year I become a stronger "peony fan," with fresh admiration and enthusiasm for these big balls of fragrance and beauty. A fine peony is really an investment, growing and beauty. A fine peony is really an investment, growing handsomer each year of its establishment, absolutely hardy and permanent. Peonies are properly planted only in the fall, but if you will include them in your spring order the plants will be sent at just the right time. In planting, the new shoots, or "eyes," should not be covered with more than 2 inches of soil, and the earth beneath made very firm to prevent sinking. Bone meal is the ideal fertilizer.

The quotations are for strong divisions, none with less than three sprouts, many with six or more. Double flowers unless particularly specified as single.

PEONIES—DOUBLE SORTS Alexander Dumas: Bright pink and cream shades and the unusually long blooming period of this sort, make it of extraordinary value in the .75 Early....

Baroness Schroeder: Big globular flower of soft flesh-white. Late mid-season	
Felix Crousse: Bright red, large and full. Midseason	
Festiva Maxima: Large and handsome white flower, showing splashes of crimson in the center. Early	
Karl Rosenfield: A huge globe of dark crimson. Extra. Mid-season	
Lora Dexheimer: Intense flaming crimson. Late mid-season	
Marguerite Gerard: Flesh pink, fading to white. Just a few stamens in the center. Extra large. Late	
Mary Brand: An immense flower of vivid crimson, with a very delightful fragrance. Blooms in clusters. Mid-season	
Monsieur Jules Elie: Pale lilac rose, with lighter collar. Early and fine	
Solange: Compact, globular flower, a combination of white delicately tinged lilac, with flesh and apricot tones toward center. One of the handsomest of all 4.00	
handsomest of all	
pink, splashed with violet rose. Mid-season75	
PEONIES—SINGLE, SEMI-DOUBLE AND JAPANESE TYPES	
These blooms lend themselves to most artistic cut-flow arrangements, and are equally admired on the plants. Albiflora, the Bride: A single row of broad white	er
petals encircles a mass of golden stamens. A vigorous grower and a free bloomer 1.75	
Ama No Sode: Bright rose pink, merging into lighter tone at margin. A very large flower. One of the very finest Japanese peonies 6.00	
Gypsy (Japanese): Dark Tyrian rose. A large, loose, artistic flower. Mid-season 2.00	
Goldmine: A beautiful deep rose Japanese peony, with center of rich gold	
Mikado: Crimson petals surround a mound of golden petaloids. Very large. Japanese, of course	
Pride of Langport: An exquisite single pink, brilliant yet soft in color	
Yeso: An attractive white flower, sometimes tinged pink. Japanese	
Fuyajo (Japan): Dark maroon with velvety sheen. Two rows of guard petals. Conspicuous petaloids striped crimson and white 5.00	

I HAVE OTHER PEONIES

Perhaps but a few of some of the choicer sorts, but decidedly worth seeing at blooming time, to make selection for your own garden. Early June in normal seasons.

PERUVIAN LILY: (See Alstromeria).

Phlox Subulata--Graceful and Gay

PHLOX DECUSSATA (Hardy Phloxes)

Phloxes were always an important feature of old-fashioned gardens, and they're equally indispensable now. No other perennial is quite so valuable for mid-summer flower masses, and the plants thrive equally in full sun or half shade. They like rich soil. If possible, plant at least a half dozen of one sort, for massing is essential to get the finest effect. Most of them are pleasingly fragrant.

E.	ach D	ozen
Commander: Brilliant cherry red, massive trusses.		
Long blooming period. Medium height. NEW	.40	4.00
Europa: White flowers with distinct red eve.		
Visitors often compare it to old-fashioned		
calico. Tall	.25	2.50
Milly von Hoboken: The largest, handsomest,		
daintiest pink in my gardens to date	.40	4.00
Mrs. Jenkins: Late blooming, fine white	.25	2.50
Mrs. W. E. Fryer: Pure white, extra large truss		
of flowers	.25	2.50
Miss Lingard: Extra early white, often blooming	- 10	,
several times in a season	.25	2.50
Orange Scarlet: A dozen of these would arrest		
attention in any border. The color is dazzling	.25	2,50
Pantheon: Deep true pink. Immense flowers and		
truss. Best of all for garden effect	.25	2.50
The President: One of the fine pale pinks	.25	2.50
W. C. Egan: Pink, decided yet delicate	.25	2.50
4		
PHLOX AMOENA: (R) Only 4 in. high, suited		
to rockery or the garden. Bright pink flowers		
entirely cover the plant in late spring. In my		

.25 2.50

own beds it gave a secondary blooming, attracting much attention from October until the

middle of December

E	ach I	Oozen
PHLOX COERULEA: (R) Trailing. Bright blue flowers especially fine to combine with pink or lavender Phlox Subulata	25	3.50
PHLOX DIVARICATA CANADENSIS: (R) Large flowers of old blue. Appreciates a little	.33	3.30
shade. 8 inches	.25	2.50
A trailing plant which soon forms a mat of bright green, changing to a solid rug of color when in flower. Lilac—especially good Pink White PHLOX SUBULATA "VIVID": (R) Brilliant rose pink, blooms several weeks later	.25 .25 .25	2.50 2.50 2.50
than others. Does not spread. Extra choice	.35	3.50
PHYSALIS FRANCHETI "Chinese Lantern Plant": The seeds are produced in brilliant orange capsules about the size of an egg. These dry for effective winter decorations. 18 inches	.25	2.50
Soft lavender pink	.25 .25	2.50 2.50
White PHYSOSTEGIA VIRGINICA "VIVID": Deep rose colored spikes which appear in late summer when the perennial border is very bare. They look well for six weeks. Splendid cutting material. An excellent harmony with Japanese Anemone "Queen Charlotte"	.23	2.30
Japanese Anemone "Queen Charlotte" PHYTEUMA WAGNERI: (R) Crowded heads of blue flowers. Sun and a gritty soil	.35	3.50
suit phyteumas. Another rare plant PLUMBAGO LARPENTAE (Syn Ceratostigma Plumbaginoides): (R) Said to have been discovered on the walls of Pekin, this Chinese plant is invaluable in the rock garden, as it introduces a note of intense blue in the fall, when that color is scarce indeed. Fine	.35	3.50
autumn foliage	.35	3.00
in height	.30	3.00
bells in May. 8 inches. Use it as an edging or in the rock garden. POLYGONUM VACCINIIFOLIUM: (R) A rare prostrate shrub from the high Himalayas. Once established, the spikes of small pink flowers are freely produced. It is ideal for falling over a wall. Fine autumn tints. A	.25	2.50
very few plants at	.75	7.50
POTENTILLAS		
Alpina: (R) Handsome, small foliage, yellow flowers. 4 inches tall	.35	3.50
low. 15 inches	.35	3.50
Cinerea: (R) A little gem, but an inch high, with lovely yellow flowers	.35	3.50

	. 1 10	
Potentilla Nepalensis "Roxana": (R) An English novelty of the very highest merit. Large single flowers of an arresting orange-pink are produced throughout the summer on vigorous plants which attain a height of 18 inches and	ach D	
a spread of 2 feet or more	.35	
able for being produced all summer		2.50
HARDY PRIMULAS (Primros		
-	ach D	ozen
Auricula (Swiss Primrose): (R) Glossy leaves of leathery texture serve as a base for the numerous flower stems on well-established plants. A great variety of rich, velvety colors, usually with contracting threats.	20	2.00
with contrasting throats Bulleyana: (R) Rich apricot yellow, on whorled	.30	3.00
spikes. 2 feet	.50	5.00
Cashmeriana: Globular flower-heads of dark lilac, borne on stems from 6 inches to 1 foot Denticulata: A vigorous sort with round heads	.30	3.00
of flowers ranging from pale lavender to deep purple. 1 foot	.30	3.00
rest of the family, the flowers are a most unusual shade of orange red	.50	5.00
light shades, not necessarily white. Impos- ing two-foot stems carry them	.35	3.50
Japonica Rosea: (R) Very strong growing. Flowers of varying shades of pink and rose are borne in whorls on 2-foot stems	.50	5.00
Pulverulenta: Of most amiable disposition and imposing appearance. With ample moisture and rich ground it grows two to three feet tall. The flowers of soft rich red are borne in successive whorls	.35	3.00
Vulgaris (English): (R) In varying shades of yellow, rich red, maroon, etc., many showing distinct eyes of contrasting color. Nothing could be prettier in early spring than a gener-		
ous border of these flowers	.25	2.50
these is very limited	.75 1.00	7.50 10.00
PRUNELLA WEBBIANA: (R) These make charming little mounds of color 6 inches high, ranging from pale rose to deep purple PULMONARIA ANGUSTIFOLIA AZUREA:	.30	3.00
(R): In early spring, when the white Arabis is out, this Pulmonaria opens its flowers of gentian blue. It is exquisite and rare. 6 inches. Light shade	.50	5.00
green leaves effectively blotched with white. Flowers blue through mauve to pink. 1 foot	.50	5.00

PYRETHRUM: "Persian Daisy." The flowers		
are supported on 2-foot stems and appear		
about Decoration Day. They last exceedingly	0.5	0.50
well. In mixture of white, pink and red Splendid imported double types	.25	2.50 4.00
ROMANZOFFIANA SITCHENSIS: (R) A	.40	4.00
very little white flower with a very big name.		
You'll like it	.30	3.00
RUDBECKIA PURPUREA: Big rose-colored		
daisies with a large brown central cone.		
Unique and decorative, 4 feet	.35	3.50
RUDBECKIA FULGIDA: One of the Black-		
eyed Susans, but this one blooms throughout the summer ,and is most effective where a bril-		
liant yellow flower can be used. 2 feet	25	2.50
SALVIAS (Perennial)		
	ah T	lawan
Azurea: True azure blue flowers, on airy stems	acii L	ozen
3 feet tall, make this a decided addition to the		
autumn display	.25	2.50
Farinacea: Many regard this as the handsomest		
of the salvias, the color of the flower spikes		
(and this extends down the stem) is old blue with silver overlay. Blooms from August until		
frost	.25	2.50
Globoso: White flowers, boldly arranged, con-		
vert the plant into a bush of snow in early		
summer. 3 feet	.30	3.00
Pratensis: (R) Dwarf, rarely exceeding a foot,		
with rose or purple flowers	.35	3.50
SANTOLINA CHAMAECYPARISSUS: (R)		
Often called "Lavender Cotton." Strong grow-		
ing plant of special value for the large rock-		
ery, where it soon forms an imposing mound	0.5	0.50
of silvery foliage. 2 feet	.25	2.50
SAPONARIA OCYMOIDES: (R) Trailing plant for border or rockery. A sheet of rose		
color in May and June	.25	2.50
SATUREIA MONTANA: (R) Tiny bushes of aromatic foliage, covered in spring with white		
flowers	.25	2.50
SAXIFRAGES (R)		
Until my offerings of these are more extende	d. T	shall
make no attempt to classify them with botanical	prec	ision.
make no attempt to classify them with botanical All are splendid for the rockery. Most of them p	refer	sun,
with moderate moisture.	oh T	ozen
Aeizoon, Encrusted: Rosettes of fleshy leaves	acii L	OZEII
with silvered edges. White flowers. 6 to 8		
inches	.35	3.50
Aeizoon Rosea, Encrusted: Rose pink flowers are		
a pleasing variation from most of the Aeizoon class	.50	5.00
"Beauty of Ronsdorf," Mossy: Mounds of bright		
green are practically obscured by the deep		
red flowers in early spring. Light shade	.30	3.00
Flavescens, Encrusted: Tiny yellow flowers—the	0.5	0.50
usual pretty rosette of silver-margined foliage	.35	3.50

Perennial Phloxes

, Ea	ch D	ozen
Macnabiana, Encrusted: 15-inch stems with white flowers. Autumn foliage shows handsome tints	.35	3.50
of soft rose flowers in very early spring. Half shade Mossy Saxifrage, Pink: The green rosettes are	.35	3.50
very ornamental, the pink flowers a finishing touch. Light shade	.35	3.50
mossy Saxifrage—Decipiens Rosea: Makes fine compact clumps. Pink flowers	.30	3.00
in mid-summer. One of most satisfactory of all for shade	.35	3.50
Two foot flower stems bearing hundreds of tiny white blooms	.40	4.00
quires considerable shade	.25	2.50
Particularly fine for cutting. 2 feet SCILLA CAMPANULATA: The strain offered bears spikes a foot in length, gracefully bedecked with drooping bells. They naturalize perfectly and should be planted by the hundred if space permits. Plant these bulbs in early September.	.40	4.00
Mixed blue and white	.50 .60	

SEDUMS (R)

These plants have fleshy leaves, are mostly evergreens, and thrive in well-drained, sunny places, making effective subjects for the rock garden, and the more robust growers are fine ground covers. Each Dozen Acre "Golden Moss": Bright green foliage, and equally brilliant yellow flowers. Creeping .25 2.50 oum: Vividly green, at blooming time sprin-kled with white stars. Will crowd out choicer small plants, so place accordingly. 3 inches .25 2.50 Arboreum: A bushy sort some 9 inches tall. Blush flowers..... .25 2.50 Dasyphyllum: Glaucous, bead-like foliage, pink-.50 5.00 ish-white flowers. 2 inches..... Fabaria: Large flowered. Rose..... .35 3.50 Hispanicum: One of the loveliest, with its .25 2.50 bluish-gray mats of foliage. Creamy blossoms Kamtschaticum: 4 or 5 inch stems clothed with cheerful green foliage, are topped with orange flowers..... .25 2.50 Kamtschaticum Variegatum: The foliage pleasingly varied with white..... 3.50 .35 Lydium Roseum: Low and flat, pink flowers.. Oregonum: Noticeably fleshy shoots, native to 2.50 .25 Oregon, and ranking among the most attractive25 2.50 Pruniatum Forsterianum: Golden yellow flowers, trailing habit..... .35 3.50 Vigorous trailing growth. Yellow Sun or light shade..... Reflexum: flowers. .25 2.50 Replesiana: Upright growth, very attractive. 9 .25 2.50 inches Rupestre: A British species with bright yellow 2.50 .25 flowers Sarmentosum: A light green sort from China. Creeping. Pale yellow flowers..... .25 2.50 cangulare: Gives an impression of slenderness and grace. 3 inches..... Sexangulare: .30 3.00 .35 3.50 and August. Foliage assumes reddish tones .25 2.50 touched with bright red. 3 inches..... .35 3.50 Stolonifera: Flower lavender-pink, leaves noticeably flat. 6 inches..... .25 2.50 SEMPERVIVUMS (R) All have rosettes of succulent foliage, from which spring rather fantastic spikes of flowers. Each Dozen Arachnoides: (R) "The Cob-web Houseleek." A .25 2.50 conspicuous silvery web envelopes the plant ... Brownii: Yellow flowers, 5 inches..... 2.50 .25 .25 2.50

SILENES (R)

01221120 (10)		
These are very numerous and varied. All ar culture, and admirable for the rock garden, thou Acaulis is a shy bloomer in most gardens.	e of gh S	easy ilene
Acaulis: "The Cushion Pink" of the Alps. A mound of light green 2 inches in height, studded with bright pink flowers	.50	5.00
Carmanica: A novelty for the rock garden with		
red flowers	.35	3.50
glaucous foliage. Blooming period long. 4 inches	.25	2.50
foot across and 8 inches high. White flowers	.25	2.50
Shafta: Lovely subject for the rockery or border. The habit is trailing, the flowers a soft purlish-rose, and they come in late summer	.25	2.50
SISYRINCHUM IRIDIFOLIUM (Satin Flower): (R) The plant itself looks exactly like an iris, but the flowers are distinct, in color cream with purple striping. A decided novelty for a		
SPIREA FILIPENDULA HEXAPETALA:	.40	4.00
(R) Finely cut foliage with clusters of pretty, creamy flowers on 15-inch stems	.35	3.50
SPIREA FILIPENDULA ULMARIA PLE- NA: Fern-like foliage, very good in itself, and in addition tall sprays of small white flowers. 2 feet. A very uncommon plant	.35	3.50
STACHYS CILIATA: (R) Bright green leaves variegated with white. The plant soon forms a nice clump and is particularly adapted to shady places. There are two colors of the flowers, and they are available separately; the lavender is really the more attractive. 6 inches. Lavender Stachys. White Stachys.	.25	2.00
STACHYS CORSICA: (R) A rare little carpeting plant, with tiny mimulus-like flowers of blush-white. Only 2 inches tall	.25	2.50
STACHYS LANATA "LAMB'S EARS": (R) The chief charm of this plant is its velvety foliage of pale gray-green. Especially good		
with lavender or mauve flowers STELLARIA GRAMINEA AUREA: (R) This forms an absolutely prostrate mat of yellow-	.25	2.50
green foliage. Should be planted where it will not encroach upon delicate neighbors	.25	2.50
STIPA BULBOSA: A little like the old ribbon grass which ran rampant through the orchard, but this one springs from tiny bulbs, does not		
spread, has smaller leaves, and is altogether more desirable	.25	2.50
STOKESIA CYANEA: Large aster-like flowers of lavender-blue, generously produced	.25	2.50
SWEET WILLIAM "Pink Beauty": That water- melon shade that everyone wants. Large		
plants	.25	1.50

remone Pulsatilla

DEITZEDII.

throughout the summer and fall. Orange		
scarlet spikes. 5 feet	.40	4.00
TRITOMA—STRAW COLOR: Not a named sort, but many will like this lovely color for combinations where the orange or scarlet		
might not fit	.35	3.50
TUNICA SAXIFRAGA: (R) A splendid filler and softener for the rock garden. The low clump of grassy foliage is quite obscured by the cloud of pale pink flowers resembling a miniature "baby-breath." Blooms all sum-		
mer. Use generously	.25	2.50

VERONICAS

The veronicas include some of the most delightful blues found in the garden. They are easily grown. Each Dozen Bachhofeni: One of the very handsomest of this very large family. The azure flowers are arranged on loose spikes which grow from 18 inches to 2 feet tall.....

Corymbosa Stricta: (R) Dense heads of dark blue. 9 inches..... .35 3.50 Elegantissima: Beautiful rose flowers...... .40 4.00 Gentianoides: (R) Pale blue flowers in early summer. 18 inches..... .35 3.50 Incana: (R) Silvery foliage, deep blue flowers. .25 2.50 8 inches.....

Pinnata: Finely divided, dainty leaves, with flowers of pale blue. Erect habit. 2 feet... 3.50 .35 Prenja: (R) This is seldom catalogued in America, but is a charming plant for rockery or perennial border. 9 inches. Soft blue is the

color. Blooms with the irises and is a fine foreground for them..... .35 Repens: (R) Only an inch tall, starred with azure blue flowers.....

.25 2.50

3.50

.35

3.50

"Royal Blue": (R) Grows a foot tall and bears gentian blue flowers		3.50
Rupestris: (R) A gem, with evergreen trailing foliage, and charming blue flowers in the utmost profusion	.25	2.50
Rupestris Rosea: (R) A pale pink form of the well-known Rupestris, which will be a real novelty in most rock gardens	l	3.50
Saxatilis: (R) Mats of evergreen foliage, with intense blue flowers in the spring. 2 inches	.35	3.50
Spicata: Blue flowers of varying shades. 12 to 20 inches		2.50
Spicata Alba: (R) 9 inch spikes of snowy white	.30	3.00
Spicata Rosea: (R) Spikes of rose flowers. 1	.25	2.50
True Blue: The most intense color of any veronica in my gardens. A rich gentian blue. The plant is slow to increase. 9 inches	.40	4.00
VIOLA GRACILIS—"G. WERMIG": (R) Deep purple, in form and color a close approach to the true violet. The plant soon forms a broad mat and blooms prodigally for six months of the year if the withered flowers are sheared. Unequaled for rich bedding ef-		
fects, bordering a walk or drive	.25	2.00
at a time. Sun—or a little shade	.50	5.00
some very old garden flower escaped from cultivation. It is quaint and saucy-faced, and blooms all summer in profusion. Prevailing color purple. Small plants, but they will bloom	5	
generously by mid-summerVIOLET—CALIFORNIA: Strong growing	.50	
with rich green leaves and large single violets of delicious scent		2.50

VIOLAS—Scotch Bedding

These are like pocket-edition pansies, much freer blooming, and admirably adapted to bedding and borders. An afternoon shade is agreeable to them, though in Portland's climate they do well in full sun. Fine for the rock garden.

Admiration: Velvety purple.

Firmament: Sky blue.

Lutea splendens: Glowing yellow.

Rose Queen: Really a mauve.

Sulphurea: A light yellow.

Half dozen, 40 cents. The full dozen, 75 cents.

SHRUBS		
	rby p luded Each l	e too oints. I with Dozen
Racemes of delightfully fragrant purple flowers in late summer, very attractive to the butterflies. Should be cut back within three feet of the ground in early spring. Flowers first season.		
Small plants	.50	
shrubs for the rock garden. The flowers are pink with exquisite fragrance. 18 inches. Stocky plants. 6 inches tall	1.50	
DEUTZIA "PRIDE OF ROCHESTER": A noble shrub attaining a height of 8 feet. Very double flowers, white tinged with pink, cover the bush in late spring. Each 50c and \$1.00. FORSYTHIA SUSPENSA: Given support, the gracefully weeping stems reach a height of 8		
or 10 feet. A golden shower lovely to behold in early spring. 2 to 3 foot plants	.35	
shrub from the Himalayas. Creamy-white flowers and glossy-black fruits. The bark is vivid green in winter. For mild regions only.		
PYRACANTHA COCCINEA: A superb evergreen reaching a height of 10 feet or more and bearing large clusters of orange scarlet berries, which persist throughout the winter. Fast growing. Best planted against house or trellis.		5.00
Very small bushes. 1 foot in height. Specimen plants to.	1.00	5.00 10.00
SPIREA REEVSII—DOUBLE: These make splendid specimens or groups, smothered in small double white flowers in early summer. They grow 6 feet or more in height. Strong		
stocky bushes, 15 to 18 inches	.35	
SPIREA—VAN HOUTTE: Gracefully drooping branches covered with clusters of small white flowers to their tips. Six feet tall. Sometimes called "Bridal Wreath."		
Small, stocky bushes	.30	
WEIGELIA—PINK: Handsome bushes with bell-shaped single flowers on graceful branches, usually in bloom on Decoration Day. 6 to 8 feet. Each 50c and 75c.	1.00	20.00
	ach I	ozen
AMERICAN PILLAR: Probably the most used of all roses for an arbor or trellis. Single flowers of bright pink with lighter centers. It is particularly fine when trimmed back as a bush	.35	
rose, also. Good plants Extra large	.75	

Each D	ozen
ROSA HUGONIS: From Northern China. The habit is drooping, each branch clothed its entire length with sulphur yellow single roses in May. It attains height of 6 feet. The handsomest shrub of recent introduction. 1-year	
plants	5.00
ROSA LA MARNE: (R) Single roses of a delightful pink cover the bush all summer and late into the fall. The vigor of the plant goes into flowers rather than the bush, which is not over 15 inches tall. Particularly fine for the	
rockery. Large plants	6.00
Small bushes	6.00
bushes	4.00
SHRUBS FOR THE ROCK GARDEN	

The very low growing ones and those of slender growth will be found in the perennial list, as follows:

Daphne Cneorum
Erica Carnea Rosea
Helianthemums
Penstemon Menziesii
Polygonum Vacciniifolium
Rosa La Marne

SEEDLINGS

I have an immense stock of extra choice seedlings—plants which will give generous bloom late this coming season if given good care, and be fine specimens for next year. They are offered at very special savings if you are willing to go to the trouble of this extra care.

NOT LESS THAN A DOZEN OF ONE SORT SOLD. If you can't use that many, get your neighbor to join in the order. Per dozen Aquilegia Coerulea \$.50 Cheiranthus Allionii .50 Myosotis Alpestris Victoria Indigo Blue..... .50 Papaver Rupifragum..... Potentilla Roxana.... Primula Japonica Alba 1.00
Primula Japonica Rosea 1.00
Primula Pulverulenta—extra fine 1.00 Sweet William—Auricula eyed giants. Sweet William—Newport Pink.... .50 Scabiosa Columbaria..... 1.00 Sisyrinchum Iridifolium
St. Brigid's Anemones 1.00

YOU'LL DO YOURSELF A FAVOR

If you will add one or more books, written by my friend, Louise Beebe Wilder, to your garden-book shelf. Beautifully illustrated. The two having most to do with rock gardening are called:

to do with rock gardening are called:
"Adventures in My Garden and Rock Garden"
"Pleasures and Problems of a Rock Garden"

Yes, you can get them at any good book store, and their purchase won't bankrupt you, either. Mrs. Wilder is an authority on rock gardens—her own is famous.

SEEDS

Such persistent inquiry has come for seeds that I am offering the following choice assortment. All are fresh gathered from my gardens this past season, and should give fine results. No guarantee whatever is given, however, as care is the secret of success with seeds and that is manifestly beyond my control. Occasional failures must be expected, too, by even the most experienced.

All should be started under glass or indoors. An excellent soil to use is a good garden loam with about a third to the control of the cont

As soon as plants are large enough, transplant and until established. Refer to any book on gardening sand. shade until established.

for more detailed instructions.

A uniform price per packet is quoted. A generous quantity of seeds is included in the commoner and more prolific kinds, comparatively few to the packet in the rare sorts.

The price, 25 CENTS PER PACKET, postpaid.

"IF YOU COULD HAVE ONLY A DOZEN ROCK PLANTS, WHAT WOULD YOU CHOOSE?"

A customer with a small rock garden asked me one day. It did not take long to name them, for there are a few that are outstanding for vigorous and graceful growth, prodigal bloom and lovely massing color effects, which must serve as the basis for all rock gardens, and can well be used to plant an entire garden if it is a small one.

They would include:

Phlox Subulata: Literally smothered in flowers.

Aubretias: Unequalled for delicate lavenders and purples.

Alyssum Saxatile: A "Basket of Gold," heaped to over-flowing.

Aster Sub-coerulescens: A deft harmony in mauve and gold. Phlox Amoena: For me, a sheet of brilliant rose twice a season.

Dianthus Caessius: With foliage as decorative as the flowers.

Nepeta Mussini: Lavender flowers against a foil of gray foliage.

Thymus Lanuginosus: Prostrate, wooly gray foliage. Evergreen, besides.

Thymus Coccineus: Its blobs of midsummer crimson are indispensible.

Plumbago Larpentae: Just imagine gentian blue flowers in the fall.

Sedum Pruniatum Forsterianum: The handsomest of all sedums.

Saponaria Ocymoides: Looks like a million dollars—costs

25 cents.

Erigeron Mucronatus: Little daisies by the hundreds all

season.

Iris Pumilla: Quaint little duplicates of the tall sorts.

Papaver Rupifragum: "Delicious" is the only adjective for this apricot beauty.

What did you say? "The list already has over twelve plants." Why, so it has! But frankly, it's impossible to include the indispensibles in a meagre dozen. Allow me twenty-five next time and I'll do better.

And now the list has been made, it strikes me it might well serve as a collection for the beginner in rock gardening, or anyone just starting a rockery, no matter how experienced, so I'm going to call it

"THE BACKBONE COLLECTION"

A strong plant of each of the 15 sorts described above, regularly sold for \$4.00, will be sent for \$3.50.

A Convenience For Late Planters

Many folks move into new homes in the summer, when it would be difficult to establish ordinary rock plants to advantage. As a special convenience for customers in this class, I am potting some hundreds of plants. Shaken out with care, so as not to break the ball of roots, these can be set at any time, and with a little extra attention will make remarkable growth immediately.

When ready to plant, pay a visit to the gardens and see what we have.

Instructions for Ordering

Send remittance or bank reference with order. Please do not send orders under \$1.00.

Packages will be sent to other states with charges collect, either by express or parcels post, as you may specify. Express is recommended.

This method is more satisfactory than attempting to quote postpaid prices, which must necessarily mean extremely small plants in many instances.

Six plants of a sort at the dozen rate; 50 of a sort at the hundred rate.

The greatest care is taken to supply stock true to name and effort is always made to satisfactorily adjust any error in this regard, but in accordance with the custom of the trade, no guarantee is given.

Make remittance to
